

IU Fire Safety Department SCHEDULING SYSTEM

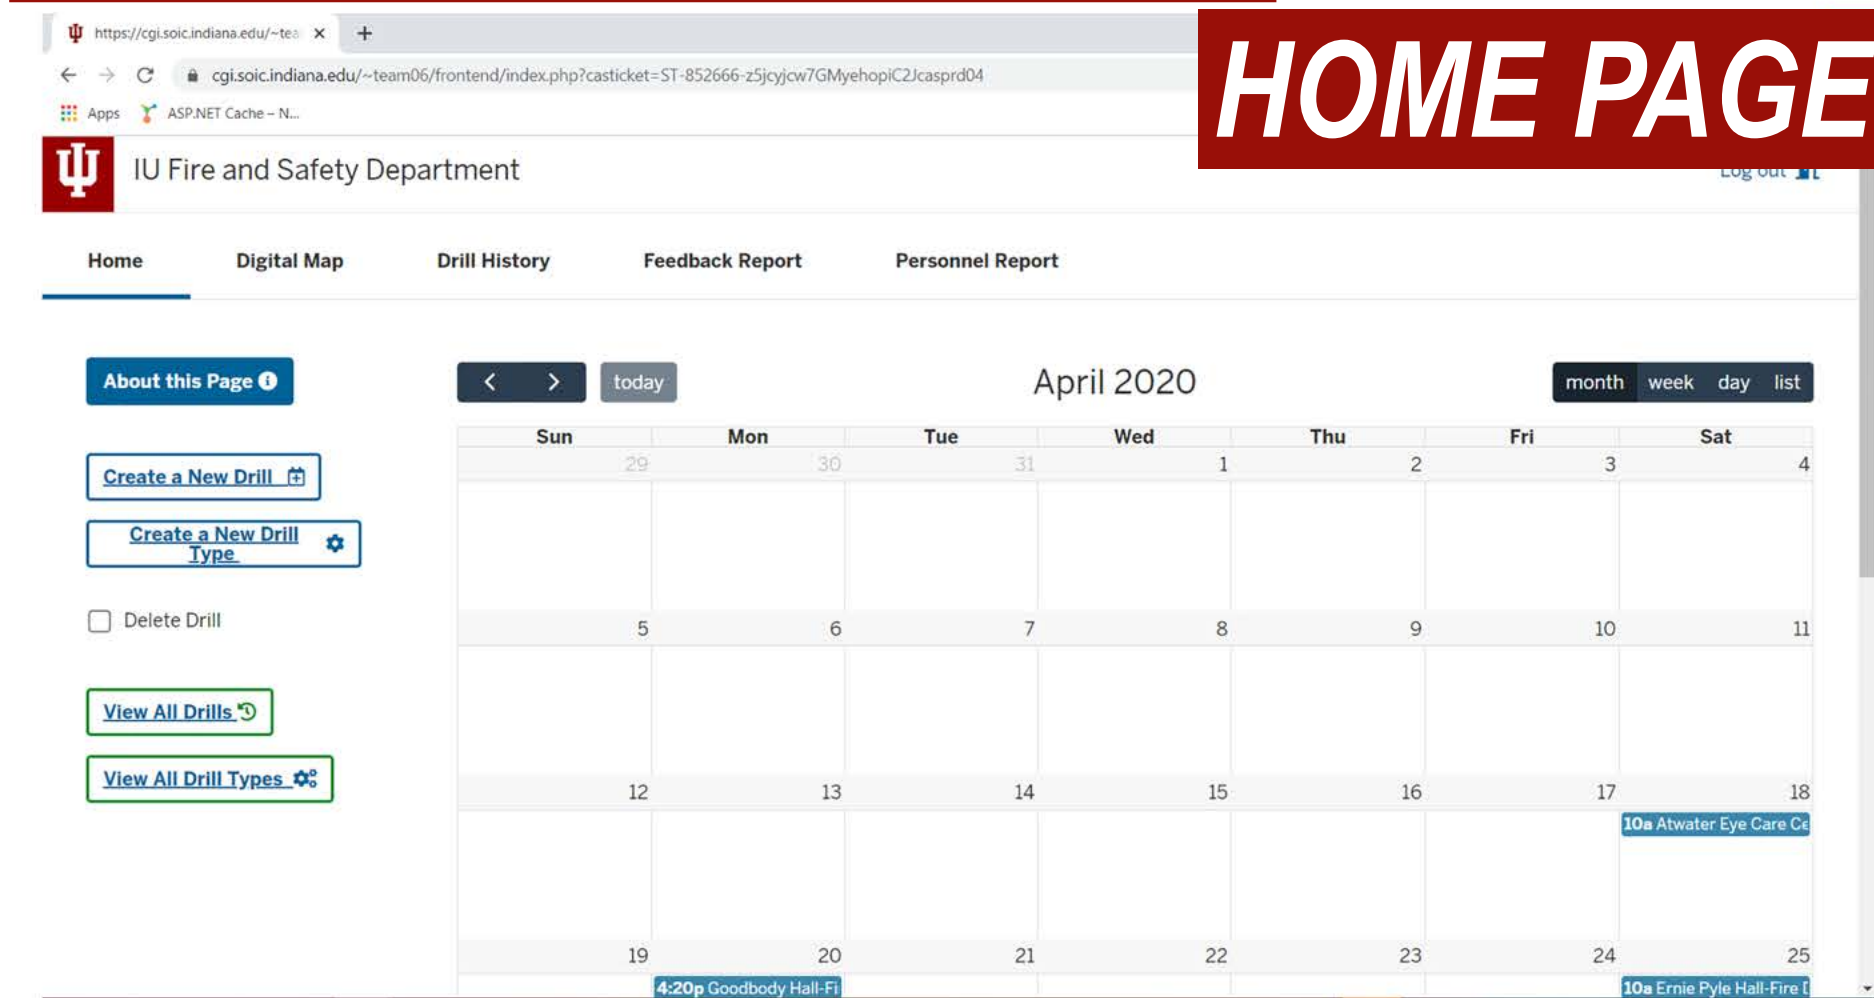

Our Product

TEAM 06 “Citrus”

We have developed a scheduling system for the IU Fire Safety Department’s management team. This scheduler simplifies their drill scheduling through features that create and delete different types of drills as well as feedback and personnel reports that correlate with each created event. It provides an efficient system of creating and managing these scheduled drill events.

Calendar Scheduling

HOME PAGE

- Create/delete events with calendar drag and drop feature or buttons provided on left of calendar

- Buttons to create drill, drill type, delete drill, view all scheduled drills and current drill types redirect to appropriate page once user clicks the button to execute that action

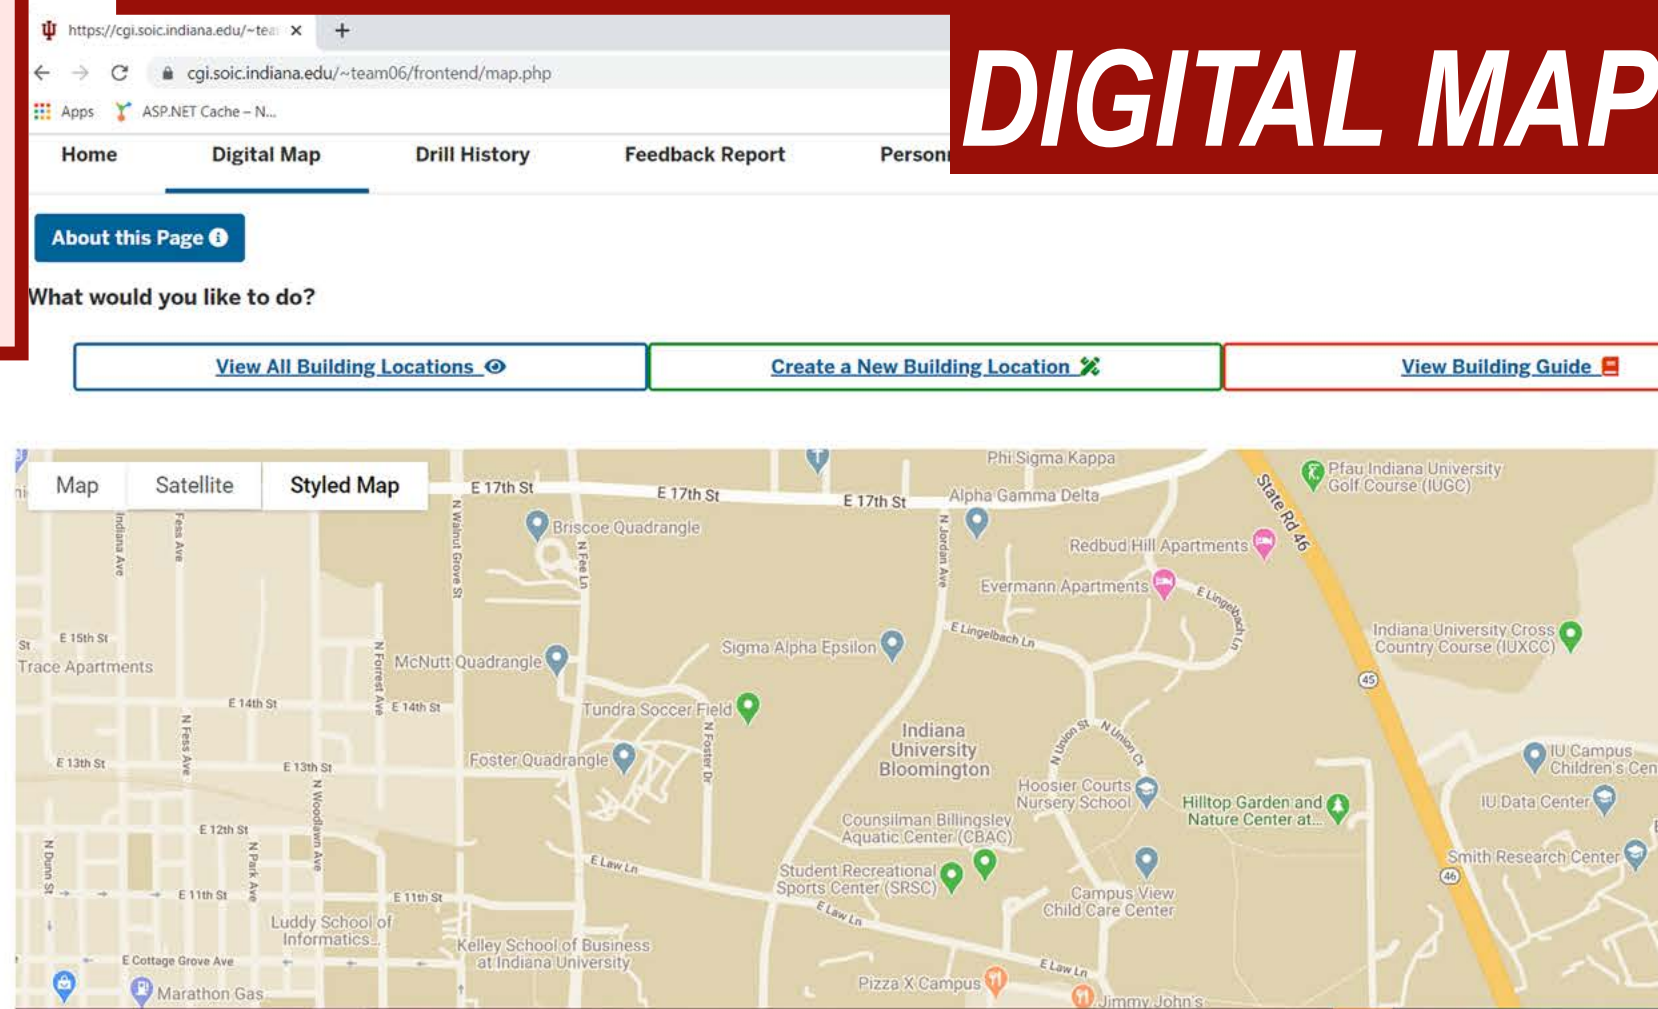

- All scheduled events appear on calendar and can be moved around and deleted upon user click.

DUO Authentication
implemented primarily
for IU faculty/students to
be authorized to log in

Building Info/Management

DIGITAL MAP

- User can use “Building Guide” button to find any building on campus using their assigned building code or simple building name

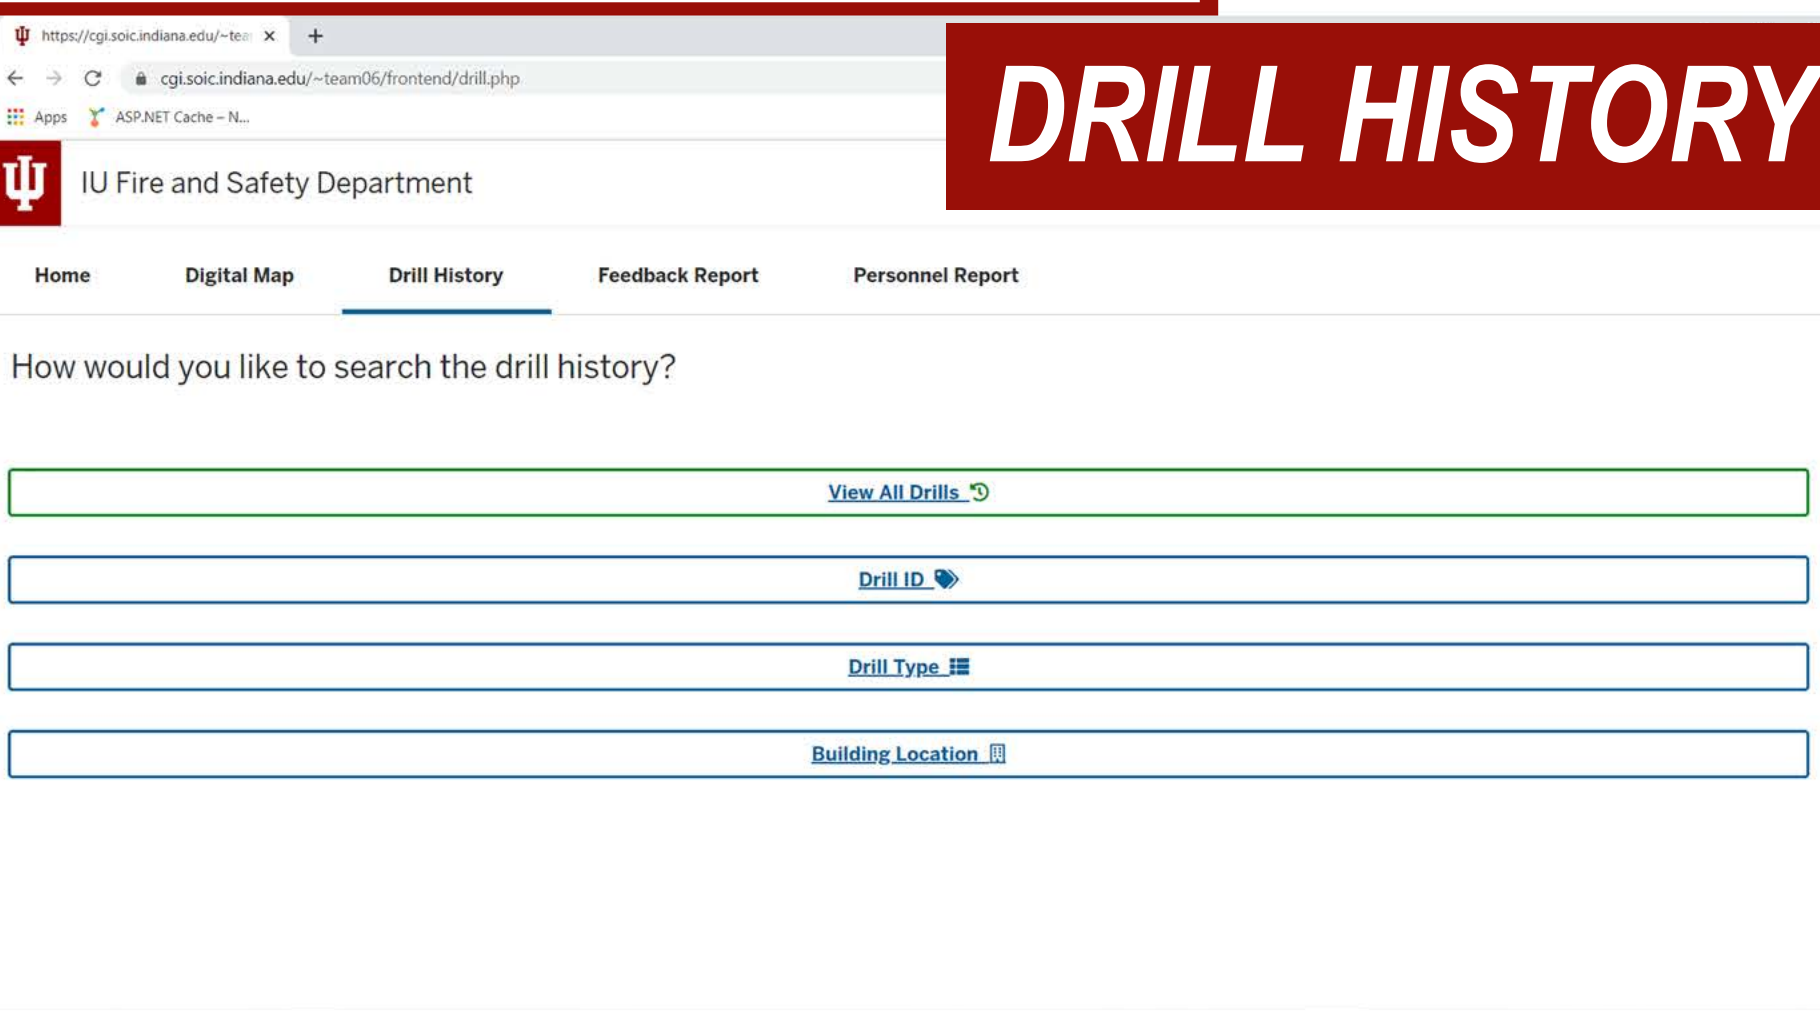

- Map provides view of entire region for better user experience and efficiency in finding appropriate building per drill

- Similar to the Home Page, here user can view entire drill event history through different categories and manage them through that

- Provided buttons prompt user to search the drill history through Drill ID, specific drill location, or drill type

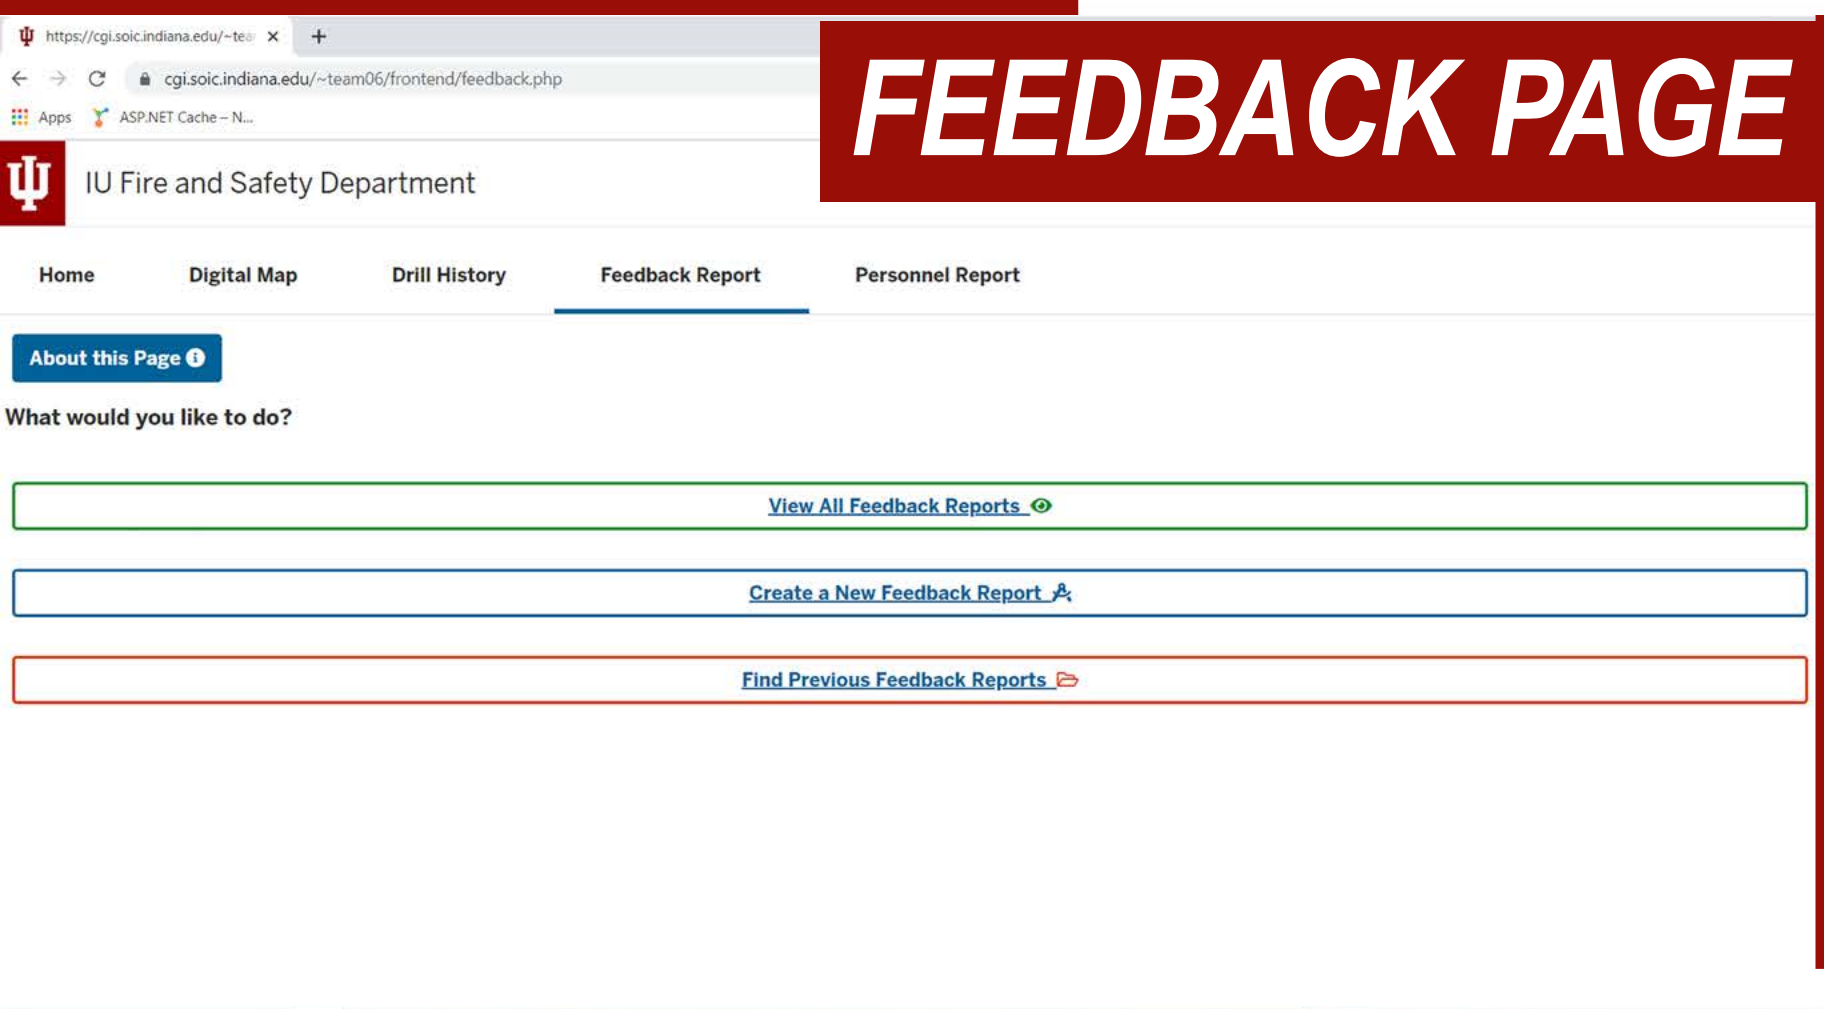

Drill Search/History

DRILL HISTORY

Feedback System

FEEDBACK PAGE

- User can create, update, and delete feedback reports relating to each location within this page

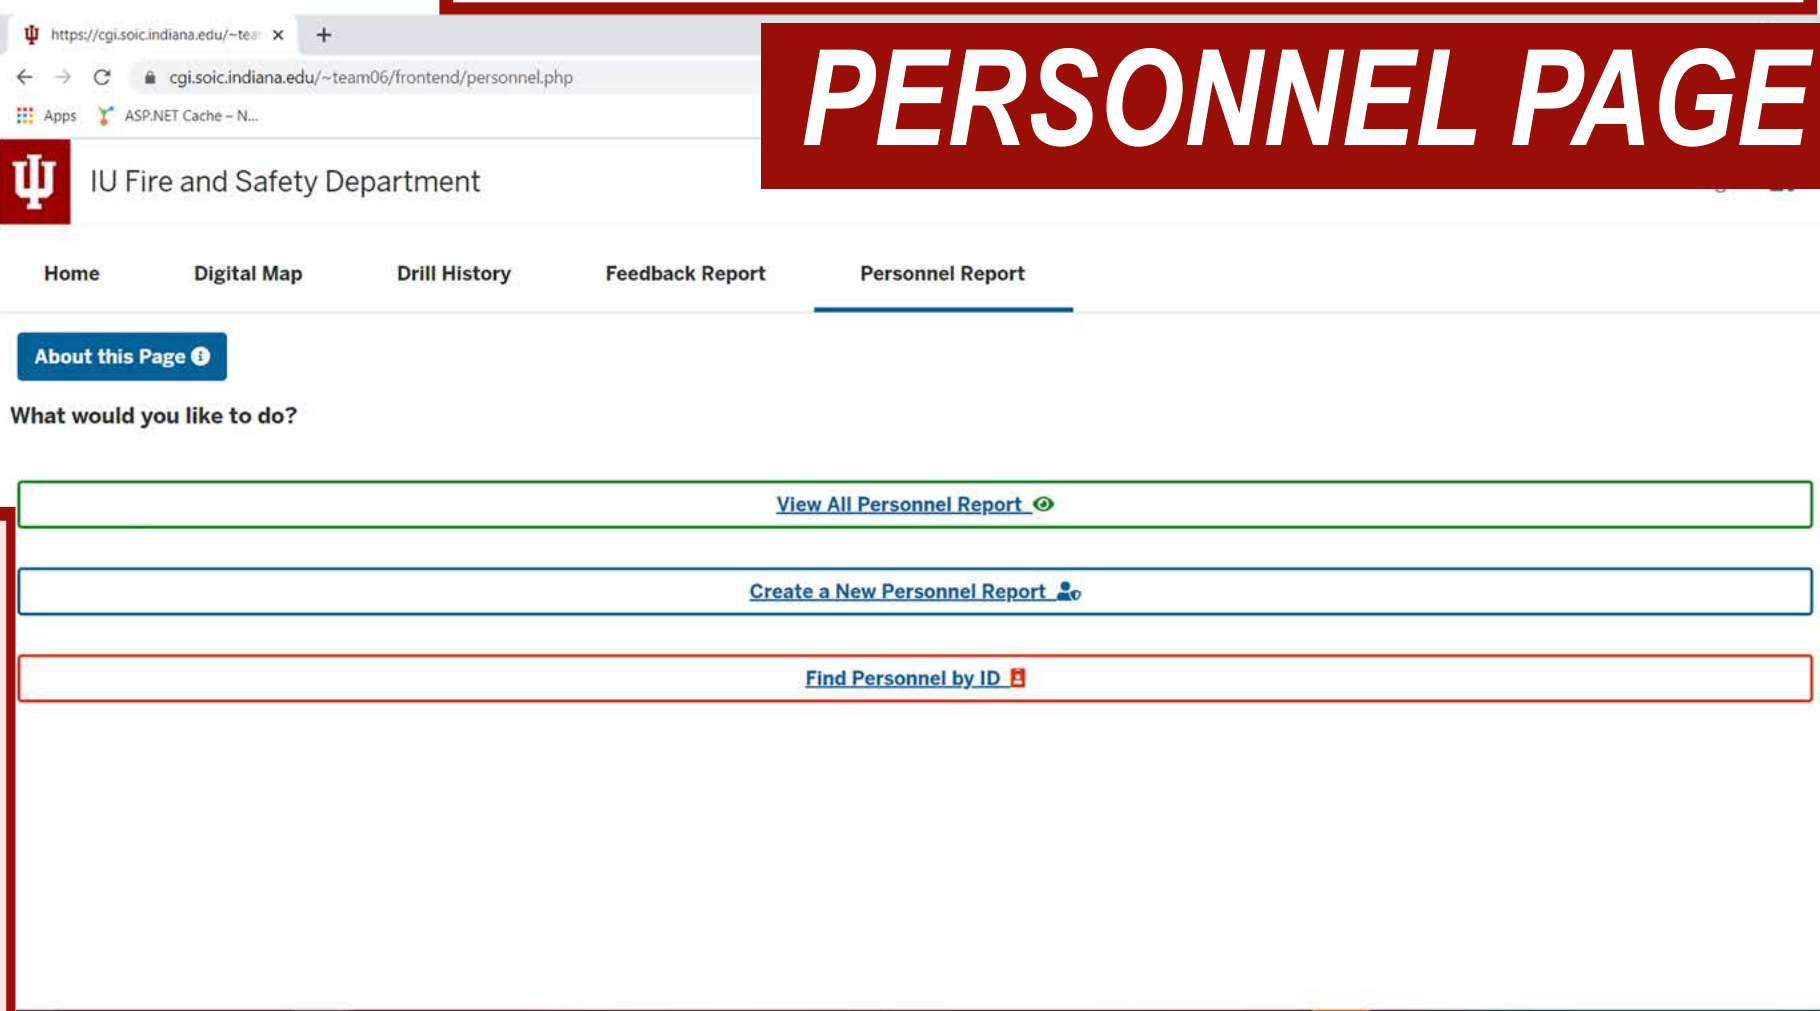

- By clicking the provided buttons, user can accordingly view all feedback reports created

- Similar to feedback report page, here user can create, update, and delete corresponding personnel and view all personnel in one table

- User can also click “Send Email” to send a new email from “View All Personnel”
